

WHO WE ARE

Signature Landscape Services is comprised of a team of certified, knowledgeable landscape professionals dedicated to customer satisfaction. With over 30 years of residential and commercial experience, we combine design, installation and renovation services into a single source for our clients. This allows for more flexibility, accountability and economy for your landscape project. Our Three Star Rating with Envirostars as well as our "Giving Back" program demonstrates our commitment to the environment and our community.

WHAT CONSTITUTES A WELL DESIGNED LANDSCAPE?

By combining differing foliage textures and colors, interspersed with focal plants, we can create a unique outdoor living space that suits your tastes, lifestyle and budget. Design, renovation, paver patios, walkways, steps, irrigation systems, water features, ornamental stone and low voltage lighting are some of the many services we offer to help achieve this goal. Proper attention to site conditions and soil preparation maximize plant health and reduce the need for water and pesticides.

WHAT TO EXPECT

We will meet you at your home where we will ask questions which help us understand your likes and dislikes, objectives and your budget. Our projects range from simple clean ups to full scale landscape renovation and installation – and everything in between. We spend as much time as it takes to assure we identify your needs and explain how we can help, regardless of project size. By really listening to you, we can help determine the most economical means to complete your project while creating a landscape that requires minimal care and provides the utmost in beauty and enjoyment.

We then put together a proposal and as necessary, a landscape plan. Upon your written acceptance of the proposal and a down payment, we schedule the work which typically takes place between two and four weeks later. Your landscape designer will then project manage an experienced crew, as well as being available to handle any changes that come up during the installation process. Any changes you request can be quickly proposed, and upon your approval, incorporated into the plan. The equipment we use on most projects is non invasive, and keeping the work site neat and safe is always a priority for us.

Upon completion of the project, your landscape designer will assure you are satisfied and answer any questions regarding the care for your new landscape and any component parts.
